SUMMARY

Information Security Engineer with 6+ years of experience specializing in Identity & Access Management (IAM), Identity Governance, Privileged Access Management (CyberArk), Vulnerability Management, and Cloud Security within BFSI environments. Experienced in implementing secure access controls, integrating PAM solutions with SIEM platforms, and strengthening Risk Management by reducing enterprise security risks through security automation and compliance-driven security practices, contributing to Citibank.

EXPERIENCE

IT Analyst, Tata Consultancy Services, Chennai

2020 — Present

- Implemented CyberArk PAM solutions including PSM, CPM, and PVWA for secure privileged access management
- Onboarded privileged accounts and enforced password rotation policies using CyberArk vault
- Integrated CyberArk with Splunk SIEM for real-time monitoring and support faster incident response
- Conducted vulnerability assessments using Qualys and reduced remediation timelines by prioritizing CVSS-based risks
- Collaborated with stakeholders to remediate audit findings aligned with GDPR and SOX compliance

TECHNICAL SKILLS

- IAM & PAM: CyberArk (EPM, PSM, CPM, PTA, PVWA) Active Directory, LDAP
- Vulnerability Mgmt: Qualys and Tanium
- SIEM & Monitoring: Splunk, ServiceNow
- Cloud Security: Azure Security, Key Vault, Encryption, RBAC
- DevOps Tools: Jenkins, GitHub, Bitbucket, AppDynamics
- Compliance: GDPR, SOX, ISO 27001, Least Privilege

PROJECTS

CyberArk PAM Implementation & Integration

- Onboarded 100+ privileged accounts into CyberArk Vault, enhancing credential protection for enterprise financial systems and enabling Privileged Session Monitoring for improved audit and security visibility
- Hands-on experience with CyberArk Privileged Access Security, including configuration and management of password vaulting and automated password rotation via Central Policy Manager (CPM)

Cloud Security & BCM Remediation

- Remediated cloud security BCM exceptions including IP whitelisting, SSL cipher hardening, vault encryption, and Identity Protection controls to strengthen overall cloud security posture
- Ensured data encryption and tokenization for cloud-stored financial data using Azure Key Vault, aligning with GDPR and ISO 27001 compliance standards

Identity Governance & Administration (IGA)

- Automated access review requests, approvals, and policy enforcement through centralized platforms while implementing Conditional Access policies and generating customizable reports
- Implemented Identity Governance dashboards to identify high-risk user accounts and streamline Identity Lifecycle Management with automated provisioning and deprovisioning workflows

Vulnerability Assessment

- Conducted enterprise vulnerability scans using Qualys across critical systems, enabling risk prioritization using CVSS scores, effective patch management, and security hardening & thereby reduced remediation time by 25%

EDUCATION

Bachelor of Technology in Computer Science, Pondicherry University

2016 — 2020

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals (AZ-900)

Qualys Certified: Vulnerability Management

AWARDS & ACHIEVEMENTS

Star Performer Award - Received an award from TCS for my contribution towards CyberArk integration

Outstanding Performance Award – Recognized for delivering on security and compliance objectives across client systems

Client Recognition – Delivered CyberArk Onboarding and Strengthened PAM Controls across enterprise system
